Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of Invention I in Paper No. 9 is acknowledged.

Specification and Claim Objections

2. The specification and claims 1-27 are objected to because of the following informalities: the specification and claims recite a "rear [sic: rare] gas element". Appropriate correction to these and any other translational errors not specifically mentioned is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6-8, 11-14, 18-20 and 23-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tanabe et al. '838. See e.g., FIG 13 depicting a channel region having a rare gas component (e.g., He or Ar) with a gradient increasing towards the gate insulating film. Regarding the dependent claims (e.g., claim 3), Tanabe expressly states that the TFT may be at least used for an active matrix LCD (col. 1, lines 1-).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4, 5, 9, 10, 16, 17, 21, 22, 26 and 27 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tanabe et al. '838 as applied to the claims above. Regardless of whether Tanabe expressly recites that the TFT may be employed for an EL display (e.g., claim 4) or one of the device applications set forth in claim 5 the other analogous claims, this claim language either constitutes an intended use of the TFT in which case the claims are rejected as being anticipated under 35 USC §102, or alternatively if these claims are interpreted to require that the TFT actually be employed in these devices, the claims would be obvious because it was well known to those of ordinary skill in the art at the time of the invention to employ TFT in these particular devices.
